GradeSense — Candidate Question Paper

Total: 15 marks

The questions below are intentionally designed to resemble real examination questions. You are not expected to have advanced subject knowledge. The question provides sufficient context to understand what is being asked.

Write your answers as a student would in an examination. For questions involving diagrams or charts, draw them clearly and label them appropriately. Follow the instructions in the assignment doc for the answers.

Question 1 — Science

5 Marks

Explain how a simple electric circuit works and illustrate your explanation with a properly labelled circuit diagram showing a battery, switch, bulb, resistor, ammeter and voltmeter. Your answer should explain how the components are connected, the path followed by electric current, and how changing the resistance affects the current flowing through the circuit.

Expected answer: Approximately ½–1 page, including a properly labelled diagram.

Question 2 — English

5 Marks

"Technology has made information easier to access, but easier access to information does not necessarily mean better learning." Discuss this statement in detail. Write a well-structured response explaining whether you believe technology makes students better learners or makes them dependent on easily available answers. Support your argument with relevant examples, consider an opposing viewpoint, and conclude with your own reasoned opinion.

Expected answer: Approximately 1–2 paragraphs / 150–200 words.

Question 3 — Economics

5 Marks

The table below shows the relationship between the **price of a product and the quantity demanded and supplied** in a market.

Price (₹)	Quantity Demanded	Quantity Supplied
10	100	20
20	80	40
30	60	60
40	40	80
50	20	100

Using the information provided, draw a properly labelled demand-and-supply graph and explain what the graph tells us about the market, including what happens when the market moves away from equilibrium and how an increase in the cost of production would affect the supply curve and the resulting market equilibrium.

Expected answer: Approximately ½–1 page, including a graph.
